

Dangerous Goods

Do you know what's in your bags, car boot or campervan? To keep everyone safe there are number of items we need to be aware of when you travel, including LPG cylinders, flammable liquids and compressed air cylinders for scuba diving.

Please read the information below and notify our check-in team if you have dangerous goods with you. Dangerous goods need to be checked in or stored securely in your vehicle, they cannot be carried on board as hand luggage.

If you are above the limit for any item, you will need to complete a dangerous goods declaration prior to sailing. If you have any doubts, please email us before your travel date.

Commonly available items that are classified as dangerous for transport include:

- ammunition
- aerosol canisters
- LPG cylinders
- oxyacetylene cylinders
- compressed air cylinders for scuba diving
- flammable liquids such as petrol, kerosene, methylated spirits, turpentine, thinners, solvent based paints, and epoxy resin
- hardener for epoxy resin
- some swimming pool chemicals
- some commercial and household cleaning products, such as dishwasher detergents
- some garden care products
- hay and straw
- diesel
- fireworks (prohibited on Interislander ferries).

Foot passengers

Any dangerous goods you are carrying need to be checked in. For safety, dangerous goods such as tramping gas cylinders and flares cannot be brought on board in your hand luggage.

If you are bringing your e-scooter, please let the team know and check it in. E-scooters can't be taken into the passenger areas onboard because of their lithium batteries.

Going on a hunting trip? As a foot passenger your guns and ammunition need to be checked in. We'll make sure your gear is looked after and guns and ammunition are kept separate.

Private cars and trucks

Please let us know if you are carrying any dangerous goods at check in. We'll provide an identifier (a hanger for your rear-vision mirror) so the loading crew are aware.

Campervans and caravans

Please let us know if you are carrying any dangerous goods at check in. We'll provide an identifier (a hanger for your rear-vision mirror), so the loading crew are aware.

A Dangerous Goods Declaration form needs to be emailed at least four hours before scheduled departure time if you are carrying more than the approved limits. For example, if you are carrying more than a 9kg LPG cylinder.

LPG cylinders need to be turned off before boarding.

Hunters, divers & fishing fanatics

Dive cylinders are allowed on board in your vehicle but need to be declared at check-in. Most recreational divers will be within the allowed limit, please check the dangerous goods limits if you are carrying large number of dive cylinders. Anything on your boat such as distress flares need to be identified at check in.

Guns and ammunition need to be stored separately in your vehicle or checked in if you are a foot passenger.

Horse trucks and horse floats

If you are travelling with more than 60kg of hay in your vehicle, trailer or float you'll need to fill in a dangerous goods declaration and email it to us at least 4 hours before your scheduled sailing. Any hay or straw you have needs to be dry and stored safely in your truck or float, or fully covered if on the deck of a ute.

LPG cylinders need to be turned off before boarding.

How to declare dangerous goods

If you have any items over the agreed limit, download and complete the dangerous goods declaration form. Email it to our team **at least four hours prior to your scheduled sailing**.

The Dangerous Goods Declaration form can be found at www.interislander.co.nz/plan/dangerous-goods

Packing, labelling and transporting dangerous goods

If you are over the limit for any dangerous goods, you will need the declared items to be labelled correctly. Once you have sent your declaration form, the team will advise you on this.

We take safety seriously at Interislander – yours, all passengers, and our team. Please take a moment to inform the crew if you aren't sure about the contents of your luggage.

Carriage of dangerous goods must follow the Interislander Conditions of Carriage, with specific reference to sections 11 and 12.

If you have any doubts about the goods you are carrying in your vehicle or luggage please check with our terminal staff.

For more information on dangerous goods, email dangerousgoods@interislander.co.nz or phone **0800 660 670**.

Dangerous Goods Limits

This information provides Limits for Dangerous Goods before you need to complete a dangerous goods declaration. Interislander does **NOT** allow any Dangerous Goods to be taken on board as hand luggage

	Drive – on Vehicles <i>Kept in vehicle, on vehicle decks</i>	Checked-in Luggage Passengers Dangerous goods CAN'T be carried on board.
Class: 1 Explosives 	<p>1.4S – UN 0012, UN0014, UN0044, UN0055 Limited to small firearm cartridges</p> <p>1.3G - Distress flares UN 0092, UN0195</p> <p>1.4G - Hand flares UN0191, Smoke flares UN0197 and Signal cartridges UN0312</p> <p>Limit of 50KG gross weight includes packaging</p>	<p>1.3G, 1.4G - Prohibited</p> <p>1.4S – UN 0012, UN0014, UN0044, UN0055 Limited to small firearm cartridges only.</p> <p>Limit of 2KG gross weight includes packaging</p>
Class: 2 Gases 	<p>2.1 : Flammable Gases Limited to less than 50L water capacity Max Cylinder size 9KG (25 Litres)</p> <p style="text-align: center;">Example: LPG</p> <p>2.2 : Non-Flammable - Limited to 90L water capacity.</p> <p><i>Note: Scuba dive tanks limit 200L water capacity</i></p>	<p>2.1 : Flammable Gases – limited up to 450g. Example: Tramping gas cannister</p> <p>2.2 : Non-Flammable - Limited to 25L water capacity Scuba dive tanks limit 50L water capacity (4 X 12L cylinders)</p>
Class: 3 Flammable Liquids 	<p>With a flash point below 23C limited to under 5 litres. With a flashpoint between 23C - 60C * limited to under 100 litres.</p> <p>Examples: Paint, Petrol, Kerosene in jerrycan</p> <p>*Flashpoint refers to the temperature where the vapour of a flammable liquid will ignite.</p>	<p>Prohibited</p> <p><i>Note: Items under 23% alcohol content are not treated as a dangerous good</i></p>
Class: 4 Flammable Solids 	<p>4.1: Up to 5kg of certain flammable solids may be carried</p> <p>Hay: Limited to less than 60kg, must be completely covered and dry.</p> <p>4.3: Limited to 1kg (solids), 1L (liquid)</p>	<p>Prohibited</p>

<p>Class: 5.1 Oxidizing Materials</p> 	<p>Up to 5KG (solids) or 5L (liquids) Packing group 11 or 111</p>	<p>Prohibited</p>
<p>Class: 5.2 Organic Peroxides</p> 	<p>Type A: Prohibited</p> <p>Type: B – limited to 5kg (Solids), 5L (liquids)</p> <p>Type: C, D, E, F – limited to 10kg (Solids), 5 L (liquids)</p>	<p>Prohibited</p>
<p>Class: 6.1 Toxic Substances</p> 	<p>Up to 5kg (solids), 5L (liquids) may be carried.</p>	<p>Prohibited</p>
<p>Class: 6.2 Infectious Substances</p> 	<p>Example: Portable toilet effluent, septic tank waste and sewage screening sludge.</p> <p>Up to 100 litres (or one portable toilet)</p>	<p>Prohibited</p>
<p>Class: 7 Radioactive Materials</p> 	<p>Prohibited</p>	<p>Prohibited</p>
<p>Class: 8 Corrosives</p> 	<p>Batteries Acid: UN2794 & Batteries Alkali: UN2795 Limited to less than 250L (measured by volume of battery case)</p> <p>UN3028: Dry Batteries containing Potassium Limited to less than 250kg</p> <p>All other corrosive substances: Limited to less than 5kg (solids) or 5L (liquids).</p>	<p>Prohibited</p>

	<p>Mixed Load Max Quantity: Max combined mix load of items is 250 being liquids (Litres) or solids (kg) in total.</p> <p><i>If a combined total of liquids and solids is over the 250 limits, then goods MUST be carried as FREIGHT CARGO ONLY. (cannot travel in passenger vehicle)</i></p> <p><i>Note: Diesel with a flashpoint of over 60C can be carried with a limit of 100 Litres</i></p>
