

Dangerous Goods Limits

- This information provides limits for Dangerous Goods before you need to complete a dangerous goods declaration manifest.
- If you have any doubts about the goods that you are carrying, please contact the Dangerous Goods Team on 0800 660 670.

Notes:

* Diesel with a flashpoint of over 60C can be carried with a limit of 500 Litres

** Flashpoint refers to the temperature where the vapour of a flammable liquid will ignite

	Drive-On Vehicles Kept in vehicle, on vehicle decks	Walk-On Passengers
 corrosives	Batteries-limited to less than 250L (measured by the volume of the battery case) Other Corrosive substances-limited to less than 5kgs (solids) or 5L (Liquids)	Must be stowed in a vehicle, cannot be carried on board
 gases	Flammable Gases-limited to less than 50 L water capacity. <u>Max cylinder size 9kg (25 Litres)</u> Non-flammable, non-toxic gases limited to 90 L water capacity Scuba dive tanks limited to under 200 L water capacity	Flammable Gases-limited to 25 L water capacity. <u>Max cylinder size 9kg (25 Litres)</u> Non-flammable, non-toxic gases limited to 25 L water capacity Scuba dive tanks limited to 50 L water capacity (4 Cylinders)
 flammable liquids	With a flashpoint** below 1C limited to less than 5 Litres With a flashpoint between 1C and 60C limited to less than 100 Litres Examples: Paint, Petrol, Kerosene	With a flashpoint* below 1C limited to 1 Litre With a flashpoint between 1C and 60C limited to 5 Litres Examples: Paint, Petrol, Kerosene
 oxidising materials	(Substances that yield oxygen, contributing to the combustion of other material) Up to 5kg or 5L of certain oxidising materials may be carried-please ring and check 0800 660 670 if carrying this product.	Must be stowed in a vehicle, cannot be carried on board
 flammable solids	Up to 5kg of certain flammable solids may be carried-please ring and check 0800 660 670 if carrying this product.	Up to 1kg of certain flammable solids may be carried-please ring and check 0800 660 670 if carrying this product.

	Drive-On Vehicles Kept in vehicle, on vehicle decks	Walk-On Passengers
 organic peroxides	(Thermally unstable substances which may undergo exothermic self-accelerating decomposition) Up to 10kg or 10L of certain oxidising materials may be carried-please ring and check 0800 660 670 if carrying this product.	Must be stowed in a vehicle, cannot be carried on board
 toxic substances	Up to 5kg or 5L of certain toxic substances may be carried-please ring and check 0800 660 670 if carrying this product	Up to 1kg or 1L of certain toxic substances may be carried-please ring and check 0800 660 670 if carrying this product
 radioactive materials	There are no exclusions when carrying this product-it MUST be properly declared and a Dangerous Goods Manifest completed. Please call the team on 0800 660 670 to get a form emailed to you for completion. Form needs to be received 24 hours prior to sailing	Must be stowed in a vehicle, cannot be carried on board Must be declared and Dangerous Goods Manifest completed
 infectious substances	Portable toilet effluent, septic tank wastes & sewage screening sludge. Up to 100 Litres or one portable toilet.	Must be stowed in a vehicle, cannot be carried on board
 explosives	Limited to certain small arm cartridges, hand flares, smoke flares, distress flares and signal cartridges only with a limit of 50kg gross weight including packaging. Please ring 0800 660 670 if carrying <u>any</u> of this class of product	Limited to certain small arm cartridges only with a limit of 2kg gross weight including packaging. Please ring 0800 660 670 if carrying <u>any</u> of this class of product
 miscellaneous including dry ice and petrol engines	(Articles that present a danger during transport not covered by any other classes) Up to 5kg or 5L of certain miscellaneous substances may be carried-please ring and check 0800 660 670 if carrying this product*	(Articles that present a danger during transport not covered by any other classes) Only Diesel with a flashpoint of over 60C can be carried up to 10L
